

Road Paving Project Update: Nov. 13

JD Asphalt is back today paving. As of 4:30 today, 1/2 of Canvasback and the entire area of Activities Way in front of the clubhouse was paved today. You can expect to see Activities Way blocked off tonight. Part of the area in front of the mailboxes will be re-opened tomorrow but the parking area will remain closed for another couple of days while it cures.

Paving will continue tomorrow on Canvasback and Swann Drive from the 4-way stop to the corner of the east end of the street. Caution, there may be some temporary detours during the paving of Swann Drive. This includes the parking spaces in front of the office and playground. Those needing to visit the office and/or clubhouse should park on the side of the pool or along the grass next to the marina on Laws Point. As with other parking areas, additional time for curing will limit access to the parking for a few days. Striping of the parking areas, replacement of stop blocks, and installing the new pavement speed bumps will begin once paving is complete.

We hope to have the project completed this week. As before, please try and avoid driving on the new paving until after the second side has been completed. Then, where possible, please try and stay off the second side for at least a day. Also, avoid turning your vehicle wheels on the new pavement, especially on the edges to give it maximum time to cure and become as strong and long-lasting as possible.

Please submit any questions through the portal on our website or contact the office.
